The new MBO K765 Efficiency Automatic:

Need to enhance your added value? The new MBO K765 EA is ideal for printing houses with a wide variety of products and small print runs, and conventional and digital printing companies that wish to offer direct-in-house processing.

Thanks to the sophisticated MBO technology the high quality folding remains, the new MBO machine was designed from scratch combining efficiency and profitability.

As stated in its name, the new K765 Efficiency Automatic is all about automation.

MBO automated the components that require the most frequent adjustment, saving the operator time and allowing more productivity.

In fact the setup times were reduced by up to 80% but not to the price of folding precision.

The operator will be even more at convenience with the new noise insulation that makes the K765 EA the world's quietest folding machine in its class.

For more automation, a common plug for the power supply and control functions was built in to replace the two used previously, but the new MBO K765 EA provides also automatic clearing of remaining sheets, removal of control sheets at each station, single control and box counter at deliveries etc...

MBO installed a new hardware and software concepts. The MBO-VARIO-CONTROL touchscreen is **easy to operate and fast to set-up** with its preconfigured folding types and the possibility to configure other folding variants, preventing operating errors.

The opening for infeed and outputs were reduced to the absolute minimum in terms of size, but its compact appearance is a trompe-l'oeil since all machine components are easily reached via separate access panels and the outlets can be opened and closed without having to move the delivery out of the way.

Dynagraph traces its roots back to the 1970s. Dynagraph is at the cutting edge of transfer of printing technology.

Dynagraph for Printing Industry Ilc, Dubai serves as a regional hub, operating from the commercial capital of the United Arab Emirates to coordinate all activity in the Gulf.

Dynagraph for Printing Industry Sal (Offshore) and Dynagraph Lebanon sal cover the near eastern markets.

Dynagraph is a small to medium size business with 90 employees.

Dynagraph aims for a balanced product mix between supplies, prepress, press, after press, converting, consumables and services

In prepress with both standard and bespoke hard and software solutions from DTP to high-end systems Dynagraph deals with manufacturers such as Fuji Film Graphic Arts or DuPont.

In press, sheet and webfed manroland is Dynagraph's partner provides a wide range of highly developed presses and services, whether in commercial, packaging or publishing printing.

In after press, our partners in this sector are leading manufacturers like Kolbus, MBO, Schneider_Senator, Theisen & Bonitz, and others.

Kolbus offers the most extensive machine range in the industry. Hardcover as well as adhesive bound products such as catalogues, magazines, schoolbooks, paperbacks, and a variety of other products.

For special types of projects for the packaging and converting industry, Dynagraph works together with world leading manufacturers and foremost suppliers of products for solid board, corrugated board and flexible packaging industries e.g. Mark Andy, Winkler+Dünnebier,
