

Majan invests in a Heiber & Schroeder box erecting machine

Majan Printing & Packaging Company LLC generates 90% of its revenue from folding carton. The purchase of a Heiber & Schroeder Carton Erecting and Tray Forming machine CE 1000 is only natural to meet a great demand for packaging.

Flexibly designed, the CE 1000 can process a wide range of materials as thin as 200 gsm board or as thick as 1.5 mm corrugated. Applications include all kinds of food packaging, like trays with glue flaps inside/outside, clam sheels with glue flaps inside or outside, trays with one lid and chip scoops, in part for the Quick Service restaurants market.

The Carton Erecting and Tray Forming CE1000 machine stands for an economic production, saving you the cost of die-cutting, folding and gluing, and packing.

Equipped with the world's most sold feeder principle, an electronically controlled timed belt feeder through which precut forms are fed, the CE1000 features a teach-in-function for setting the job, there is no need to measure the carton or to use cams, hence the feed length and timing can be carried out in less than a minute.

Its gluing unit is fitted with 6 individually movable units, from which 4 normal and 2 double-width glue pots and bottles, for a cold glue application from the top. The bottle is placed to maintain a constant glue level automatically and the glue quantity is metered by a small and easy to handle thump wheel.

In the forming station the blanks are controlled by top and bottom belts for accelerated transportation to the forming tower. The standard forming tower comprises the equipment for the majority of standard trays, except for the individual forming blocks.

For more information on Heiber & Schroeder and its product range please contact your local Dynagraph partner.

Dynagraph traces its roots back to the 1970s. Dynagraph is at the cutting edge of transfer of printing technology.

Dynagraph for Printing Industry Ilc, Dubai serves as a regional hub, operating from the commercial capital of the United Arab Emirates to coordinate all activity in the Gulf.

Dynagraph for Printing Industry Sal (Offshore) and Dynagraph Lebanon sal cover the near eastern markets.

Dynagraph is a small to medium size business with 90 employees.

Dynagraph aims for a balanced product mix between supplies, prepress, press, after press, converting, consumables and services

In prepress with both standard and bespoke hard and software solutions from DTP to high-end systems Dynagraph deals with manufacturers such as Fuji Film Graphic Arts or DuPont.

In press, sheet and webfed manroland is Dynagraph's partner provides a wide range of highly developed presses and services, whether in commercial, packaging or publishing printing.

In after press, our partners in this sector are leading manufacturers like Kolbus, MBO, Schneider_Senator, Theisen & Bonitz, and others.

Kolbus offers the most extensive machine range in the industry. Hardcover as well as adhesive bound products such as catalogues, magazines, schoolbooks, paperbacks, and a variety of other products.

For special types of projects for the packaging and converting industry, Dynagraph works together with world leading manufacturers and foremost suppliers of products for solid board, corrugated board and flexible packaging industries e.g. Mark Andy, Winkler+Dünnebier,
