Mark Andy to Debut the latest Performance Series Presses at Labelexpo Europe

Mark Andy, a global leader in narrow-web press manufacturing, debuts the latest models in the Performance Series line of flexo printing machines - the P5 and P3 - at Labelexpo Europe 2011. These models will be on display along with the premier machine of the series, the P7 which made its debut at Labelexpo Europe 2009.

Over 100 Performance Series machines have been sold worldwide including the P3, a conventional label press driven by a precision-engineered direct drive train; the P5, a servo-driven, productivity-focused machine and the highest selling of the series; and the P7, the most advanced model with dual servo controls and fully-automated registration system.

The Performance Series has taken the world by storm, winning the 2011 FTA Flexographic Technical Innovation Award for its innovative print head design. This annual honor is bestowed upon companies "who seek ways to further refine and advance the flexographic print process and who bring significant contributions to the industry in terms of adoption, change and competitive posture."

Live demonstrations will be held daily on the P5 and P7 machines, providing valuable information to attendees of the dramatic waste savings, quick set-ups and changeovers and ease of use with the Performance Series press line. Additional presentations will arm converters with the questions and facts that need to be asked and analyzed when considering a digital solution for their flexo printing facility. With the significant advancements in technology, short runs are becoming more and more achievable with flexo solutions.

To view live demonstrations, learn more about how these recent advancements in flexo can bring you more profits, or to discuss specific applications with a Mark Andy specialist, visit the Mark Andy stand in Hall 5, Stand C10 at Labelexpo Europe, 28 September - 01 October, 2011.

Dynagraph traces its roots back to the 1970s. Dynagraph is at the cutting edge of transfer of printing technology.

Dynagraph for Printing Industry llc, Dubai serves as a regional hub, operating from the commercial capital of the United Arab Emirates to coordinate all activity in the Gulf.

Dynagraph for Printing Industry Sal (Offshore) and Dynagraph Lebanon sal cover the near eastern markets.

Dynagraph is a small to medium size business with 90 employees.

Dynagraph aims for a balanced product mix between supplies, pre-press, press, after press, converting, consumables and services

In prepress with both standard and bespoke hard and software solutions from DTP to high-end systems Dynagraph deals with manufacturers such as Fuji Film Graphic Arts or DuPont.

In press, sheet and webfed manroland is Dynagraph's partner provides a wide range of highly developed presses and services, whether in commercial, packaging or publishing printing.

In after press, our partners in this sector are leading manufacturers like Kolbus, MBO, Schneider_Senator, Theisen & Bonitz, FERAG, Perfecta and others.

Kolbus offers the most extensive machine range in the industry. Hardcover as well as adhesive bound products such as catalogues, magazines, schoolbooks, paperbacks, and a variety of other products.

Ferag develops and manufactures Postprint components and systems for the newspaper printing industry, offering printers a modular concept.

For special types of projects for the packaging and converting industry, Dynagraph works together with world leading manufacturers and foremost suppliers of products for solid board, corrugated board and flexible packaging industries e.g. Mark Andy, Winkler+Dünnebier,
