Al Arz Printing Press expands the current size of its printing press

As part of its expansion plan Al Arz Printing Press purchased from Dynagraph Lebanon Sal an MBO K760- 4 SKTL Combi Folding machine together with an Autobond Mini 76 TH

Al Arz has always been a loyal and valuable customer to Dynagraph. Their machine park already counts two R704 and one R201 offset press made MAN Roland.

In addition to 500 m² of office space, Al Arz Printing Press as part of its expansion plan added some 1,200 m² to its existing production mainly to grow its prepress, post press and finishing departments.

Al Arz's partners, Mr. Semaan, Ibrahim and Walid Khoury opted for a folding machine from MBO and a thermal laminating machine from Autobond as they meet perfectly with their business requirements, not to forget the sizable and significant role played by Dynagraph's after sales service and long term commitment.

An MBO K760-4 SKTL as well as an Autobond Mini 76 TH thermal laminating machine fitted with a rising pile back separation stream feeder, a sheeter and a jogging table was therefore delivered and installed by Dynaserv a service company affiliated to Dynagraph.

The Mini 76 TH has a maximum sheet size of 76 x 102 cm and a speed of 45 metres/minute or 2,700 sheets per hour of 74 x 102 cm, 4,250 sheet per hour of 52 x 74 cm, or 8,000 sheets per hour of 36 x 52 cm.

The MBO K760-4 SKTL equally offers an economical and reasonable alternative with the Efficiency series. The standard combi folding machine K 760 offers a maximum format size of 76x108cm and is a profitable investment. In fact, its proven- and process-saving components allow it to increase its output. Thus the "all-in-one" principle enables a flexible use, reduced set-up times, a minimal downtime and an accurate folding quality.

For more information about MBO Binder GmbH & Co. KG and Autobond Ltd. and their product range kindly refer to your local Dynagraph partner

Dynagraph traces its roots back to the 1970s. Dynagraph is at the cutting edge of transfer of printing technology.

Dynagraph for Printing Industry Ilc, Dubai serves as a regional hub, operating from the commercial capital of the United Arab Emirates to coordinate all activity in the Gulf.

Dynagraph for Printing Industry Sal (Off-shore) and Dynagraph Lebanon sal cover the near eastern markets.

Dynagraph is a small to medium size business with 90 employees.

Dynagraph aims for a balanced product mix between supplies, pre-press, press, after press, converting, consumables and services

In prepress with both standard and bespoke hard and software solutions from DTP to high-end systems Dynagraph deals with manufacturers such as Fuji Film Graphic Arts or DuPont.

In press, sheet and webfed MAN Roland is Dynagraph's partner provides a wide range of highly developed presses and services, whether in commercial, packaging or publishing printing.

In after press, our partners in this sector are leading manufacturers like Kolbus, MBO, Schneider_Senator, Theisen & Bontz, and others.

Kolbus offers the most extensive machine range in the industry. Hardcover as well as adhesive bound products such as catalogues, magazines, schoolbooks, paperbacks, and a variety of other products.

For special types of projects for the packaging and converting industry, Dynagraph works together with world leading manufacturers and foremost suppliers of products for solid board, corrugated board and flexible packaging industries e.g. Mark Andy, Winkler+Dünnebier,

-is a member of the Dynagraph Group

The MBO K760-4 SKTL has just been installed at Al Arz Printing Press and is ready for operation.

One of the MBO combi folding machine's major assets is that the height of the knife can be adjusted and aligned without any tools and during the production process.

Al Arz's Mini 76 TH thermal laminating machine is fitted with a rising pile back separation stream feeder, a sheeter and a jogging table.

As all Autobond equipment and machinery, the Mini 76 TH guarantees higher calibre, fast and accurate results.
