Modern Printing Co., Beirut, Lebanon purchases a Mark Andy 2200XL through Dynagraph

Modern Printing Co. a commercial offset printer in Lebanon enters the narrow web flexo market and invests in a Mark Andy 2200

The 2200 is available in 3 option packages, all upgradable and flexible, with various levels of options providing maximum versatility and customization never seen before.

Mr. Richard Nasraoui, owner and operator of the press, chose the so called 'next generation', among other peculiarities because the fully capable Mark Andy 2200XL is simple to operate and so requires a low operator intervention, minimal adjustments and provides the operator simple access and control of all press functions.

The 2200 model has been re-engineered to deliver the best possible value through its key technology improvements. The users will witness an improved and consistent high print quality through a robust and more rigid print station, but also a higher throughput due to a better dryer performance for higher speeds.

The new Mark Andy 2200 has the fastest set-up and changeover in its class, a complete station can be set up in less than 1 minute, no inking adjustments are required, change repeat size is made without adjustment, and impression setting changes are completed within seconds with substrate change.

Still Mr. Richard Nasraoui preferred feature is the cold foil, since 'there are no limits to the combination one can create along with the printing'.

A plus to go with today's trend to be environmentally friendly, the new Mark Andy 2200 allows a 50% decrease in waste through its intelligent auto registration system.

Last but not least, a decisive reason that convinced the owner Mr. Richard Nasraoui to invest in a Mark Andy narrow web press is as per his statement 'the technical assistance in Lebanon is perfect.'

For more information on Mark Andy and its product range please contact your local Dynagraph partner.

Dynagraph traces its roots back to the 1970s. Dynagraph is at the cutting edge of transfer of printing technology.

Dynagraph for Printing Industry llc, Dubai serves as a regional hub, operating from the commercial capital of the United Arab Emirates to coordinate all activity in the Gulf.

Dynagraph for Printing Industry Sal (Offshore) and Dynagraph Lebanon sal cover the near eastern markets.

Dynagraph is a small to medium size business with 90 employees.

Dynagraph aims for a balanced product mix between supplies, prepress, press, after press, converting, consumables and services

In prepress with both standard and bespoke hard and software solutions from DTP to high-end systems Dynagraph deals with manufacturers such as Fuji Film Graphic Arts or DuPont.
